Comments -
<ul style="list-style-type: none">• Professor Jiang is a great professor. Sometimes he skips over stuff quickly and I cannot keep up, but most of the time he is able to set up meetings outside of class if you do not understand.• I loved this class in a way that I've never really enjoyed a math-related course before. I felt that its level of difficulty was great, and the way in which you taught is very easy to understand and you provide good examples, too. Despite my praise, though - there is one big problem I have with the course - we barely did any group work during the semester, and I think that would help to bolster learning in the course and make it overall more enjoyable.• Good professor. Would have liked the class more if I actually enjoyed/was interested in econ.• excellent teacher• I liked Ethan as a professor but the course was not very engaging. I like that he provided power points so that we could go back to them. He really cares about student success and will help students any way he can.• He is always very friendly and helpful with answering any questions in class or through email• He loves what he is teaching. I hate economics but had to take it. His passion about the subject made me more interested.• Dr. Ethan is the best econ teacher I've ever had. He keeps the material interesting and is very passionate about teaching• The homework was very helpful.• I appreciate the homework problems and the test reviews provided. They were very helpful. I appreciated being able to take my tests online, especially since I often have test taking anxiety. This was comforting! Please know that I appreciate you!
