My personal technological resources were adequate for successfully complet- ing this course.	50% (8)	37.5% (6)	6.25% (1)	6.25% (1)	0% (0)	16	0	-	-

Qualitative

Comments -

- He was a good professor and tried to help everyone learn but it was still a difficult topic to learn.
- He makes complex ideas easy to understand and apply to real world situations.
- He is a nice professor that tries hard to keep us engaged in class. The topic material for me isn't exciting but the kahoots every once in awhile bring me happiness.
- This class was slightly more difficult than I anticipated, but it was manageable. I wish the homework was more reflective of the exam, because the MindTap homework was unrelated in my opinion. Perhaps, the professor could create a scholar homework set that matches the phrasing that is used on the exam, because that would be more helpful.
- Dr. Jiang is a great professor. While I am only taking this course to fulfill my liberal learning requirement, I found some of the course material useful for some other classes I am taking. He is also very understanding and genuinely wants students to succeed. He helps in any way possible to ensure every student is understanding the material.
- I didn't really like how the homework and test questions didn't match up with each other. In addition, the practice test questions are way harder than what's taught in class which can be frustrating. I think Professor Jiang did his best to try and facilitate participation, however there could have been more exercises or group work to get the class involved more. The Kahoots he did at the beginning of semester were really fun and watching videos in class was also helpful.
- Professor Ethan is a great teacher. He is able to make difficult topics seem simple for those, who are not naturally inclined with the topic. Not only that but he is very empathic to his students and just expect them to try their best and is always willing to help and work with his students. It shows that he cares about his students success.
- I personally do not enjoy economics, but this course was required. I do not feel that it was necessarily needed to further my education. However, the professor did take time to make sure that his students understood the material, which I appreciate.
- Class often felt a bit slow but I do appreciate your desire to make sure the students who may be struggling are able to keep up with the material. Thank you for the semester!
