Qualitative

Comments -
<ul style="list-style-type: none"><li>• Dr. Jiang has an unparalleled ability to break down the concepts of microeconomics into a way that makes sense. I've only had experience with one other economics professor at CNU, but Dr. Jiang is easily leagues ahead of him. I appreciate how knowledgeable he is, and how effective he is at conveying what he knows in a digestible manner. However, I do wish that he would make more of an attempt to connect with students.</li><li>• He is a great teacher and extremely helpful.</li><li>• Great professor! Very understanding and friendly with his students.</li><li>• Great professor!</li><li>• Dr. Jiang is a great professor who is talented at making this difficult class easy to grasp. He is great at being concise and clear when it comes to learning new material and always works through multiple practice problems in class to make sure we understand the material. He always makes the class fun and inviting. Overall he is a great professor and would most certainly take a class of his again.</li><li>• I have no complaints about Professor Jiang. He really cared about getting to know the language students spoke and always wanted to make sure everyone was on board.</li><li>• He knows the topic, but I think it being completely online made it a lot harder to grasp.</li><li>• He takes his time with each student and questions during classes. He is able to almost eradicate online difficulties with his willingness to explain in-depth concepts and calculations. He never makes students feel as if their questions are stupid or a burden and regularly encourages dialogue between students on the politics(and other stuff) that play into microeconomics.</li><li>• Professor Jiang is an absolutely amazing professor. I've never had a mind for economics, but I passed this class with flying colors. He takes the time to explain the lesson to its fullest extent despite times of repetition or seeming obviousness. Very well taught, and a very personable professor to boot.</li><li>• Thank you for extra credit opportunities!!</li><li>• Professor Jiang did an excellent explaining the topics in this course. In class he provided multiple examples so that we could see how economic principles actually effect the economy and our day to day lives. He encouraged class participation, and waited in silence for a response sometimes - I think that's something professors should do more often. The Kahoots that he did in class were very enjoyable and fun to do.</li><li>• Ethan was so nice and helpful. I am ending with an A and have learned a lot. He is very helpful with any questions or concerns you may have. He is willing to work with you on things you may be struggling with in his class.</li><li>• Professor Jiang is a super sweet guy. He facilitates learning effectively, provides incentive for that learning, and is accommodating when someone is struggling. I think the course he is teaching is incredibly confusing and not easy enough for a 200 level, but he tries his absolute best to help everyone understand. Great professor; I don't like the course.</li><li>• Professor Yixiao Jiang is a caring professor who goes out of his way to make sure students fully understands topics. He frequently asks if anyone has questions and is willing to answer them fully. He finds fun ways to review course materials and is responsive to emails. Lastly, he always ties current topics to real world situations. I would highly recommend him to another student.</li><li>• Professor Jiang (Ethan) is a great professor. I really appreciated that he took the time to explain concepts and even would review them in the next class. He always asks if there is questions and will review any material at any point. Overall, great professor!</li><li>• N/A</li><li>• Professor Jiang is very friendly and truly cares about his students and their growth in the class.</li><li>• Enjoyed this class but it was difficult for me to take this class online</li><li>• I really enjoyed this class. I felt like the homework and Kahoots really helped me understand the information.</li><li>• As the survey asked several times, I think Professor Yixiao Jiang presented what we learned in a way that made it practically applicable, or so that we could understand talk about related topics out in the world. This subject is not my forte, but I appreciated that element of it, and it made it more interesting than the economic principles would have been on their own. I know that many logistical elements were complicated this semester by being online in a large class, but I think it would benefit from having a way to make more people regularly participate or raise their hands.</li><li>• Dr. Jiang is a great professor and is clearly passionate about the topic he teaches. He is very knowledgeable and is able to help students understand the content covered. He was very accommodating for my academic and testing accommodations. Dr. Jiang should be a highly valued member of the CNU Economics Staff.</li><li>• Thanks for a awesome semester!</li><li>• He is a good professor. The only things I would say to improve is that his lectures get very boring and hard to pay attention to sometimes, so if those were more engaging the class would be great!</li><li>• I really enjoyed this class. I struggled with keeping up with the fast pace a bit but other than the Professor Jiang taught really well and gave a broad understanding of the information.</li><li>• Professor Jiang did his best to teach despite the virtual limitations</li><li>• Thank you for a great class, Jiang! I really appreciated the homeworks that were assigned with your teaching method; these two things flowed really nicely together and made for a smooth learning of microeconomics.</li><li>• You were an awesome professor! You always explained concepts clearly and took time to make sure people understood. I wish I had you for macroeconomics haha. Thanks for a great semester :)</li><li>• This course was very beneficial to me</li><li>• Professor Jiang is an amazing teacher and I enjoyed every class.</li><li>• I absolutely loved having Professor Jiang!!! Quite honestly I don't think I would have passed if I had any other teacher. I'm not good at math related things at all but he explained and taught everything so concisely and easy to understand that I actually have a good grade. He has made this subject enjoyable and easy. His style of teaching was beyond helpful. I can't emphasize enough how great of a professor he is. One thing that I especially loved that he did, that none of my other teachers have ever done was when we would learn something that had a lot of steps or parts or was difficult he would briefly pause after each part and would say "I want to give you guys 2 minutes to digest what I've just talked about and feel free to ask questions." This was beyond helpful because it allowed me to quickly summarize and fully comprehend or process what was going on. This is the most helpful thing any teacher has ever done. He is beyond knowledgeable and relates it to real life examples and makes everything so easy to understand. Also, another aspect about his teaching is that it's an interactive lesson and he's beyond amazing at responding to wrong answers in a gracious kind way that not a lot of teachers are able to do. He's so accommodating and understanding and funny and keeps class interesting and fun. Also he's good at reaching a young audience, for example he always had kahoot quizzes to review which everyone loved. He's an absolutely amazing professor.</li></ul>
